BY APPOINTMENT TO
H.M. THE KING
MANUFACTURERS AND DISTRIBUTORS
OF CERAMIC TILES AND BUILDING PRODUCTS.
PORCELANOSA UK LIMITED

PORCELANOSA Grupo

PORCELANOSA Grupo

Trusted professional solutions

BUTECH is part of Grupo PORCELANOSA, a world leader in the design and production of superior quality ceramics. Following on from adhesives and sealing materials for ceramics, BUTECH has evolved to more complex installation systems such as façades and technical flooring.

BUTECH's main aim is to provide PORCELANOSA customers with materials and installation systems which enable successful installation of any type of ceramic flooring or cladding.

BUTECH knows what every kind of ceramics needs and offers technical as well as decorative solutions which allow its installation with total success guarantee.

Spirit of innovation

BUTECH has invested in the latest technology to develop technical solutions which facilitate the commissioning and delivery of even better designs using PORCELANOSA ceramics.

Over the last few years, BUTECH has introduced innovative installation materials, decorative profiles, shower tray and levelling systems which have become an industry standard. Moreover, BUTECH is a leading company in innovation and development of façade systems for the various cladding materials from Grupo PORCELANOSA: STON-KER, PAR-KER, URBATEK, XLIGHT, XTONE, NATURAL STONE AND KRION.

butech

Corporate Social Responsibility

At Porcelanosa we use exclusively renewable energy, generating 30% of our energy ourselves. More than 90% of our lighting is LED efficient, and half of our facilities use natural light. We have electric vehicles and in 2021 we will reforest with 17,000 trees. We reuse, recycle or recover more than 95% of our waste, and we have reduced water consumption by 20% in the manufacture of coatings, using dry grinding and reusing 100% of waste water. Our collections include between 10% and 95% recycled material, with the Ecologic series standing out. We calculate and reduce our carbon footprint annually, promoting the circular economy and contributing to LEED, BREAM and GREEN certifications.

Enviromental commitment

The environmental commitment Porcelanosa has shown toward its immediate surroundings and the environment as a whole has characterized the company since its origins is clearly reflected by ECOTECH®.

ECOTECH® is a collection of environmental ideas and initiatives, including substantial yearly investment into systems for recycling water, waste re-use, environmental protection and energy saving and it is a ISO 14001 certified environmental management system.

COB LED strips

Linear lighting system for profiles from the pro-light collection.
For pro-skirting LED, use a 5 mm wide LED strip.

COB LED luminaires are packages of multiple LEDs that are joined together into a single lighting module. In practice, only one point of light is seen, but with a higher light output. That is, with the same power as an SMD, more lumens / watt are achieved.

COB LED strip IP20

COB LED strip IP20 3000°K 2x5x2500 mm		100353220	
COB LED strip IP20 4000°K 2x5x2500 mm		100353222

one-flex

one-flex is a high tech single-component, high-performance, polymer-modified thin-set mortar for interior installations of tile. This mortar has a high content of unique dry polymer, resulting in excellent adhesion to the substrate and tile. Formulated with low-dust technology, one-flex reduces dust by 90% during pouring and mixing, resulting in a cleaner environment. Advanced, high-performance adhesive, with an excellent adherence and flexibility, suitable for the most difficult installations, like high traffic floors, radiant heating floors. Its performance and ease of application make it the ideal solution for the most demanding professionals. Specially recommended for laying rectified tiles.

Certifications/Standards:

ISO 13007 C2 E P1
ANSI: Exceeds ANSI A118.4 and A118.11

Features:

- Single-component thin-set mortar
- Polymer-enriched for high performance and deformability
- Low-dust technology reduces dust by 90% resulting in a cleaner environment.
- Smooth and creamy consistency for easy for easy application.
- Open time > 30 min.
- Mixing water: 5.5 U.S. qt per 50 lbs. bag.

Recommended uses:

- Most interior residential installations on floors and walls.
- Most interior commercial installations on floors and walls.
- Installation of ceramic and porcelain tile, quarry tile, pavers, and many types of marble, granite and natural stone.
- Indoor swimming pools or interior installations subject to prolonged water immersion.
- **one-flex** mixed with water is not recommended for areas subject to severe freeze/thaw conditions.

Substrates:

- Masonry cement blocks, bricks, cement mortar beds and levelling coats.
- Concrete (cured at least 28 days).
- Cement backer units (CBUs).
- Gypsum wallboard for interior walls in dry areas only.
- APA and CANPLY Group 1 exterior-grade plywood (interior, residential and light commercial in dry conditions only).
- Properly prepared vinyl composition tile (VCT) and cutback residue (interior only).
- Properly prepared existing ceramic and porcelain tile, quarry tile and pavers (interior only).

- Do not use directly over gypsum-based substrates. Over this kind of substrates apply suitable sealer before use. **butech** recommends **super-prim**

Materials:

- Ceramic and porcelain tiles (water absorption < 0.5% according EN-ISO 10545-3).
- Quarry tiles
- Glass and mosaic tiles
- Natural stone.
- Do not use for moisture-sensitive stone, agglomerate tiles, DQS, cultured marble or resin-backed tiles.

Before using this product in any application not indicated in this catalogue, please perform a test or refer to the product's technical sheet.

one-flex pro

one-flex pro is a type C2 TE S1 high-performance cement-based adhesive, as per EN 12004, for laying all kinds of ceramic tiles on the most used substrates in the building industry.

one-flex pro is an advanced, high-performance adhesive, with an excellent adherence and flexibility, suitable for the most difficult installations, such as high traffic floors, radiant heating floors, or facades. Its performance and ease of application make it the ideal solution for the most demanding professionals. Specially recommended for laying rectified tiles.

Certifications/Standards:
EN 12004 C2 TE S1
CSTB: 2418-222 MC 517 C2-S1-E

Features:

- Cement-based, single component adhesive.
- Excellent adherence. Flexible.
- Fine texture mortar, with excellent mixing and application features.
- High initial adherence and no sagging. Thixotropic.
- Extended working times. Open time higher than 30 min.
- Application thickness up to 15/64" (6 mm).
- Frost-resistant.
- High performance:
- Mixing water:
 - White: 2US gal lqd (8.25-8.75 L) per 25kg-55lb bag
 - Grey: 2US gal lqd (7.75-8.25 L) per 25kg-55lb bag

Substrates:

- Cement covered floors and walls .
- Concrete slabs.
- Plasterboards.
- Existing tiles in interior walls.
- Existing tiles in residential interior floors.
- On existing tiles in commercial and other public interior floors, apply super-prim.
- On anhydrite or plaster substrates, apply uniprim.
- Before applying one-flex pro on a substrate not stated in the previous listing, please perform a test or check with butech's Technical Department

Recommended uses:

- Indoor large format ceramic tile coverings.
- Indoor and outdoor porcelain tile coverings.
- High traffic floor tiles.
- Floor tiles on radiant heating.
- Pools and damp environments.

Materials:

- Large format ceramics.
- Porcelain tiles (water absorption < 0.5% as per EN-ISO 10545-3).
- Glass mosaic.
- Natural stone and marble not prone to staining.

Coverage:

- Small format and mosaic / Trowel U4: 0.61 sq ft
- Medium format / Trowels U6-U8: 0.61-0.81 sq ft
- Large format / Trowels U10-U12: 0.81-1.22 sq ft

*Approximate coverage according to laboratory tests.

Regardless of our recommendations for use indicated for this adhesive, respect the installation regulations in force in each country.

* super-prim improves the adherence on polished ceramics and glossy finishing tiles

Before using this product in any application not indicated in this catalogue, please perform a test or refer to the product's technical sheet.

super-one n

super-one n is a type C2FTS1 high-performance cement-based adhesive, as per EN 12004, ready for traffic after 4 hours. Specially recommended for quick installation and use of ceramic tiles and natural stone.

It solves the need of quick installation of any kind of format and ceramic tile, including porcelain tiles. Ready for traffic in just 4 hours, this adhesive can be used to lay ceramic tiles and natural stone in environments where high mechanical performance is needed, such as commercial or industrial flooring or flooring with radiant heating. Waterproof and frost-resistant.

Certifications/Standards:
EN 12004 C2FTS1
CSTB: 2455-252 MC 312 C2-S1-F

Features:

- Cement-based, single component adhesive.
- Ready for traffic in just 4 hours.
- Excellent adherence. Flexible.
- Fine texture mortar, with excellent mixing and application features.
- High initial adherence and no sagging.
- Extended working times. Open time higher than 30 min.
- Application thickness up to 10 mm.
- Frost-resistant.
- Mixing water:
 - 1US gal lqd 4.7-5.7 US pt lqd (6.0 - 6.50 L) per 25kg-55lb bag

Substrates:

- Cement-based screeds
- Cement render
- Concrete slabs and floors
- Anhydrite screeds, having previously applied **uniprim**
- Plasters, having previously applied **uniprim**
- Pre-existing tiles/mosaic/stones*
- Plasterboard panels
- Cement-based panels

super-flex S2

super-flex S2 is a type C2ES2 high-performance no dust cement-based adhesive, as per EN 12004, for laying all kinds of ceramic tiles on the most used substrates in the building industry. Specially recommended for laying large format, thin porcelain tiles like XTONE and XLIGHT from URBATEK.

This adhesive features excellent performance in adherence and deformability with no need for mixing with additives and excellent conditions of use: low dust generation and an only 15 kg package. This state-of-the-art adhesive includes additives and polymers which increase performance. This means that with a 15 kg bag of super-flex S2 you can lay the same tiles surface than with a 25 kg bag of regular adhesive.

Certifications/Standards:
EN 12004 C2ES2

Features:

- Cement-based, single component adhesive.
- Lightened adhesive. Low consumption onsite.
- Low emission of dust and other airborne particles.
- Maximum adherence and deformability.
- High initial adherence and no sagging. Thixotropic.
- Extended working times. Open time higher than 30 min.
- Application thickness up to 25/64" (10 mm).
- Frost-resistant.
- Mixing water: 1.59 U.S. qt per 33 lbs-15kg bag.

Recommended uses:

- Interior walls with slim tiles as XTONE and XLIGHT
- Floors and walls with XTONE and XLIGHT
- Large format indoor and outdoor ceramic wall tiles
- Large format indoor and outdoor porcelain floor tiles
- High traffic floor tiles
- Floor tiles on radiant heating
- Pools and damp environments

Substrates:

- Cement-based screeds
- Cement render
- Concrete slabs and floors
- Anhydrite screeds, having previously applied uniprim
- Plasters, having previously applied **uniprim**
- Pre-existing tiles/mosaic/stones*
- Plasterboard panels
- Cement-based panels
- acoustic insulation **fonopac r**

Materials:

- Large format ceramic tiles
- High-absorption ceramic tiles and stoneware
- Porcelain tiles
- XTONE and XLIGHT
- Glass mosaic
- Natural stone and marble not prone to staining
- DQS and other marble agglomerate

Coverage:

- Small format and mosaic / Trowel U4: 0.40 sq ft
- Medium format / Trowels U6-U8: 0.40-0.81 sq ft
- Large format / Trowels U10-U12: 0.81-1.22 sq ft

*Approximate coverage according to laboratory tests.

Regardless of our recommendations for use indicated for this adhesive, respect the installation regulations in force in each country.

* super-prim improves the adherence on polished ceramics and glossy finishing tiles

Before using this product in any application not indicated in this catalogue, please perform a test or refer to the product's technical sheet.

politech n

politech n is a type R2 T high-tech, two-component polyurethane adhesive as per EN 12004, for laying tiles on deformable substrates. Specially recommended for special substrates like metal sheets or synthetic materials, where cement-based adhesives cannot be used.

A high-tech two-component polyurethane adhesive with high performance properties. Suitable for laying ceramic tiles of all kinds on deformable substrates.

Certifications/Standards:
EN 12004 R2 T

Features:

- Two-component polyurethane adhesive.
- Excellent adherence. Maximum deformability.
- No water absorption. Waterproof.
- High chemical resistance.
- High initial adherence and no sagging.
- Application thickness up to 5/16" (8 mm).
- Frost-resistant.

Recommended uses:

- Laying of wall tiles not compatible with cement-based adhesives
- Wall tiles on substrates not compatible with cement-based adhesives
- Floor tiles on deformable substrates
- Floor tiles with special chemical resistance
- Pools and damp environments, steam rooms and spas
- Laying of slate and other natural stones with risk of deformation by water absorption.
- Interior floors as DQS by L'ANTIC COLONIAL and other marble composites
- KRION sheets

Substrates:

- Cement-based screeds
- Cement render
- Concrete slabs and floors
- Anhydrite screeds
- Renders and plasterboards
- Pre-existing tiles/mosaic/stones*
- Plasterboard panels
- Cement-based panels
- Wood panels
- Metal surfaces
- Polyester or PVC surfaces
- Glass surfaces

Materials:

- Large format ceramic tiles
- High-absorption ceramic tiles and stoneware
- Porcelain tiles
- XLIGHT
- Glass mosaic
- Natural stone and marble not prone to staining
- Natural stone and marble prone to staining
- Slates and similar sensitive to contact with water
- DQS and other marble agglomerate
- KRION and other kinds of solid surface

Coverage:

politech Premium

politech Premium is a reactive resin adhesive that is super easy to handle and easy to use, especially when we need maximum bonding strength and deformability. It is suitable for most wall coverings and substrates used in construction, ensuring the correct installation of materials such as L'ANTIC COLONIAL's AIRSLATE.

We work with it as a cement-based adhesive, but with the bonding, flexibility, and water resistance capabilities of a reactive resin adhesive. Professional use.

Certifications/Standards:
EN 12004 R2 T

Features:

- Two-component reactive resins adhesive.
- Unbeatable workability; same as that of any cement-based adhesive.
- Maximum adherence and excellent flexibility; more than 50 mm-1 31/32" in transversal deformability.
- High wettability and long open time.
- Quick-drying: admits light traffic 6 hours after installation.
- Application thickness up to 19/32" (15 mm).

Recommended use:

- Laying of wall tiles not compatible with cement-based adhesives
- Wall tiles on substrates not compatible with cement-based adhesives
- Floor tiles on deformable substrates
- Floor tiles with special chemical resistance
- Pools and damp environments, steam rooms and spas
- Stone sheets for wall coverings as AIRSLATE by L'ANTIC COLONIAL
- Laying of slate and other natural stones with risk of deformation by water absorption.

Substrates:

- Substrates in concrete and cement or anhydrite mortar.
- Slabs and cement mortar or gypsum rendering.
- Plasterboard and wood panels.
- Existing wall tiles*.
- Metal sheets.
- Surfaces painted with epoxy or polyurethane-based resins.

Materials:

- Large format ceramic tiles
- High-absorption ceramic tiles and stoneware
- Porcelain tiles
- XLIGHT
- Glass mosaic
- Natural stone and marble not prone to staining
- Natural stone and marble prone to staining
- Slates and similar sensitive to contact with water
- AIRSLATE
- DQS and other marble agglomerate

Coverage:

linkfloor fix

linkfloor fix is a solvent-free acrylic adhesive for lightweight floor coverings such as carpets, PVC, rubber or linoleum sheets, even on heavily trafficked floors. Its high performance and great versatility allow it to be used in all types of technical installations like sports venues, including walls. Professional use.

Especially recommended for installing Linkfloor floors from L'ANTIC COLONIAL.

Certificayions / Standards:
IMO nautical certification

Features:

- Solvent- and odor-free adhesive
- Excellent adhesion and flexibility
- High initial grip, especially for wall applications
- Resistant to high traffic such as hospitals or airports
- Compatible with underfloor heating
- Suitable for the installation of new PVC sheets on existing PVC flooring

Recommended use:

- Non ceramic, indoor floor and wall coverings
- High traffic floor coverings.
- Floor coverings on radiant heating.

Substrates:

- Cement covered floors and walls.
- Concrete slabs.
- Plasterboards.
- Existing ceramic floor and wall coverings.
- Existing parquet floors.
- Existing PVC floors.
- On fire-resistant or water-resistant wood panels, apply super-prim

Materials:

- Decorative PVC Tiles (LVT).
- Homogeneous and multi-layer PVC (tiles or rolls).
- PVC on cork.
- Polyolefins.
- Linoleum in rolls.
- Expanded vinyls with relief.
- Semiflexible tiles.
- Carpets with or without backing.
- Carpets on foam (latex).
- Carpets with non-woven backing.
- Carpets with synthetic back (Action Back).
- Especially indicated for Linkfloor from L'ANTIC COLONIAL

Coverage:

- Wall tiles with smooth and non-embossed backs 200 – 250 gr/m²
- Wall tiles with rough backs 300 – 350 gr/m²

*Approximate coverage according to laboratory tests.

Regardless of our recommendations for use indicated for this adhesive, respect the installation regulations in force in each country.

Before using this product in any application not indicated in this catalog, please perform a test or refer to the product's technical sheet.

skins fix

skins fix is a coloured adhesive for the installation of all types of wallpapers: non-woven fabric (TNT), vinyl, duplex, light, heavy and other wallpapers. The colour indicator marks the area where the glue has been applied, facilitating the application of the wallpaper.

Especially developed for the installation of SKINS WALLPAPER from L'Ac®.

Features:

- Ready-to-use adhesive
- Pink colour during application, transparent once dry

Recommended use:

- Interior walls with all kinds of wallpapers
- Suitable for environments with the presence of humidity such as kitchens and bathrooms
- Applicable on furniture and doors
- Suitable for all types of wallpapers: light, heavy, vinyl, woven or duplex
- Laying of slate and other natural stones with risk of deformation by water absorption

Substrates:

- Supports suitable for wallpaper, sound, dry, clean, solid, smooth and absorbent

Materials:

- Suitable for all types of wallpapers: light, heavy, vinyl, woven or duplex

Coverage:

- Approximately 0.02 alb/in² (125 gr/m²)

*Approximate coverage according to laboratory tests.

Regardless of our recommendations for use indicated for this adhesive, respect the installation regulations in force in each country.

Before using this product in any application not indicated in this catalogue, please perform a test or refer to the product's technical sheet.

POLYMER ADHESIVE

h-920

h-920 is a high-performance hybrid polymer adhesive and sealant. It polymerizes in contact with environmental humidity, becoming an elastomer with extraordinary elasticity and excellent adhesion. Free of isocyanates, silicones and solvents, provides a high grip since its application, on a wide variety of materials used in construction such as ceramic or porcelain tiles, natural stone, wood or metal. Professional use.

Features:

- Hybrid polymer suitable as both adhesive and sealant.
- Maximum flexibility
- High mechanical performance
- Great initial grip; rapid skin formation and final curing.
- Excellent adhesion even on wet surfaces and immersion
- Resistant to UV radiation and atmospheric agents
- Paintable

Recommended applications:

- Interior and exterior coatings
- Direct stick adhesive, immediate hold.
- Elastic bonding in construction on galvanized sheets, ferrous or non-ferrous metals, plastic materials or polystyrene. Especially recommended for:
 - Installation of ventilated facades.
 - Installation of raised access floors
- Bonding Concept XPS panels.
- Sealing of movement joints in walls

Supports:

- All the usual supports for laying tiles

Materiales:

- Ceramic tiles and glass mosaic.
- Brick, concrete, exposed work, marble and natural stone.
- Wood panels.
- Concept XPS and other polystyrene panels.
- Metals such as aluminum, iron, zinc and galvanized.
- PVC and plastic materials.
- KRION and other types of solid surface.

Coverage:

- Approximately 78’ 47/64” - (2 m²)/cartridge

*Approximate coverage according to laboratory tests.

Regardless of our recommendations for use indicated for this adhesive, respect the installation regulations in force in each country.
Before using this product in any application not indicated in this catalog, please perform a test or refer to the product's technical sheet.

bonded façade clips

These clips have been designed as a security element in bonded façades using porcelain tiles installed by the thin-layer and back-butter method. The use of cementitious adhesives type C2S2 according to EN 12004 is recommended.

Features:

- Stainless Steel clips 1.4301 (AISI 304 V2A)

Aplicaciones recomendadas:

- Installation of tiles on outdoor walls
- Installation of tiles in interiors, ceilings and cornices when a mechanical fixing system is needed

Types of clips:

- Type 1Middle clip: joints up to 9/32 (7mm)
- Type 2Perimeter clip: joints up to 9/32 (7mm)
- Type 5Clip for staggered pattern: joints up to 9/32 (7mm)

Coverage:

The number of clips varies with each façade design. In the case of a regular façade without gaps, the approximate number of clips would be

Straight pattern:

Tile	Clips Type 1	Clips Type 2
23 15/32" x 23 15/32"	4,5	1,1
23 15/32" x 47 1/4"	2,8	0,7
23 15/32" x 70 55/64"	2,2	0,6
15 3/4" x 3 11/2"	5,0	1,3
3 11/2" x 3 11/2"	2,5	0,6
47 1/4" x 47 1/4"	1,7	0,4
47 1/4" x 98 27/64"	0,9	0,2
59 1/16" x 118 7/64"	0,7	0,2

Staggered pattern:

Tile	Clips Type 1	Clips Type 2	Clips Type 5
9 27/32" x 59 1/16"	2,7	1,6	6,4
11 37/64" x 47 1/4"	2,8	1,7	6,8

bonded façade clips

Hidden clips

Mechanical fixing system for porcelain tiles, where the clip goes into side grooves. Once the joints have been grouted, the clips become hidden without affecting the design of the façade.

Tiles from 25/64" to 15/32" (10 to 12 mm) thick and joints up to 9/32" (7 mm)

STON-KER, SOLIDKER, PAR-KER y HIGHKER

| 4. Vaproshield Rainscreen or similar | 9. colorstuk rapid grout / epotech |
| 5. Concrete board (exterior) ½" | 10. Exposed/Hidden clips |

Clips are recommended for tiles bonded over 12'. To go with hidden clips it's required at least 10 mm thickness.

SELECTION TABLES FOR ADHESIVES

SELECTION OF ADHESIVE FOR RESIDENTIAL INDOOR FLOORING AND PUBLIC PEDESTRIAN PREMISES

Types of tiles (ISO 13006): BI _a / BI _b					
Type of substrate	Length longest side of tile				
	≤ 11 13/16	≤ 23 5/8	≤ 35 7/16	≤ 47 1/4	> 47 1/4
Cement-based screed without radiant heating	C1	C2			C2S1
Cement-based screed with radiant heating	C2	C2S1		C2S2	
Anhydrite screed without radiant heating ¹	C1	C2			C2S1
Anhydrite screed with radiant heating ¹	C2	C2S1		C2S2	
Concrete slab or floor	C1 ² /C2	C2	C2S1		C2S2
Pre-existing tiles/mosaic/stones	C2			C2S1	
Metal surfaces	R1		R2 ³		

¹ Previous priming with C adhesives.
² The reactive resin adhesive must be highly deformable.
³ The reactive resin adhesive must be highly deformable.

SELECTION OF ADHESIVE FOR COMMERCIAL INDOOR FLOORING OR FOR INDUSTRIAL USE WITH MECHANICAL REQUIREMENTS

Types of tiles (ISO 13006): BI _a / BI _b					
Type of substrate	Length longest side of tile				
	≤ 11 13/16	≤ 23 5/8	≤ 35 7/16	≤ 47 1/4	> 47 1/4
Cement-based screed or anhydrite ¹ with radiant heating	C2			C2S1	
Cement-based screed or anhydrite ¹ without radiant heating	C2	C2S1		C2S2	
Concrete slab or floor	C2	C2S1		C2S2	
Pre-existing tiles/mosaic/stones	C2		C2S1		C2S2
Metal surfaces	R1 ²		R2 ^{2,3}		

¹ Previous priming with C adhesives.
² In industrial flooring with chemical requirements, it is advisable to select R1 or R2 adhesives with chemical resistance.
³ The reactive resin adhesive must be highly deformable.

SELECTION OF ADHESIVE FOR OUTDOOR FLOORING

Types of tiles (ISO 13006): BI _a					
Type of substrate	Length longest side of tile				
	≤ 11 13/16	≤ 23 5/8	≤ 35 7/16	≤ 47 1/4	> 47 1/4
Cement-based screed without radiant heating	C2	C2 S1	C2 S2		
Concrete slab or floor	C2	C2 S1	C2 S2		
Pre-existing tiles/mosaic/stones	C2 S1		C2 S2		
Metal surfaces	R1 ¹		R2 ¹		

¹ The reactive resin adhesive must be highly deformable.

** In any case, it is advisable to check the manufacturer's technical specifications to ensure that the chosen adhesive and ceramic tile are suitable and compatible. For unique projects, it is advisable to consult the Technical Department of butech.*

SELECTION TABLES FOR ADHESIVES

SELECTION OF ADHESIVE FOR INDOOR WALLS AND CEILINGS

Types of tiles (ISO 13006): BI _a					
Type of substrate	Length longest side of tile				
	≤ 11 13/16	≤ 23 5/8	≤ 35 7/16	≤ 47 1/4	> 47 1/4
Lime/cement-based plaster with radiant heating	C1/D1	C1 ² /C2	C2		C2 S1
Lime/cement-based plaster without radiant heating	C2/D1	C2 S1		C2 S2	
Gypsum-based plaster with radiant heating*	C1/D1	C1/C2	C2		C2 S1
Gypsum-based plaster without radiant heating*	C2/D1	C2 S1		C2 S2	
Large-format ceramic brick	C1/D1	C2	C2 S1		C2 S2
Concrete	C1 ² /C2/D1	C2	C2 S1		C2 S2
Pre-existing tiles/mosaic/stones	C2		C2 S1		C2 S2
Cement/fiber cement -based panels	C1/D1	C2		C2 S1	C2 S2
Large format ceramic brick	C1/D1	C1 ² /C2	C2		C2 S1
Wood surfaces	C2/D1/R1	C2 S1/R1 ³		R2 ³	
Metal surfaces	R1 ³			R2 ³	

¹ Previous priming with C adhesives.
² In the case that the tile has a water absorption rate higher than 3%, a C1 type adhesive can be used.
³ The reactive resin adhesive must be highly deformable.

SELECTION OF ADHESIVE FOR OUTDOOR WALLS AND CEILINGS

Types of tiles (ISO 13006): BI _a / BIII					
Type of substrate	Length longest side of tile				
	≤ 11 13/16	≤ 23 5/8	≤ 35 7/16	≤ 47 1/4	> 47 1/4
Lime/cement-based plaster	C2 ¹	C2 S1	C2 S2		
Concrete	C2 S1/D2 ²	C2 S2			
Cement/fiber cement -based panels	C2 S1/D2 ²	C2 S2			R2 ³
Metal surfaces	R1 ³		R2 ³		

¹ For installation on baseboards (up to 1.5 m in height), it is possible to use a type C2 adhesive.
² If the coverings are adequately protected from rain and frost.
³ The reactive resin adhesive must be highly deformable.

SELECTION OF ADHESIVE FOR WALL COVERINGS AND FLOORING WITH CERAMIC PLATES

Types of tiles (ISO 13006): BIa				
Type of substrate	No fiber		With fiber ¹	
	≤ 11 13/16	> 11 13/16	≤ 11 13/16	> 11 13/16
Interior flooring and wall coverings	C2	C2 S1	C2 S1	C2 S2
Cladding over gypsum / fiber cement panels	C2 S2			
Heated exterior or interior flooring	C2 S2			
Facades	C2 S1	C2 S2	C2 S2/R2	R2 ⁴
Swimming pools	C2 S2/R2 ²			
Cladding over waterproofing membranes or systems	Given the variety of cases, follow the manufacturers' specifications			
Highly deformable substrates	R2 ³			

¹ Check/consult compatibility with both manufacturers in case of fiber reinforcement and use of cementitious adhesives.
² The adhesive should be “R” when the type of container, support, or intermediate layers require it.
³ The reactive resin adhesive must be highly deformable.
⁴ In the case of compatibility between both manufacturers, they can consider the possibility of a C2 S2 type adhesive.

** In any case, it is advisable to check the manufacturer's technical specifications to ensure that the chosen adhesive and ceramic tile are suitable and compatible. For unique projects, it is advisable to consult the Technical Department of butech.*

SELECTION OF ADHESIVE FOR SWIMMING POOL LININGS

		Length of the longest side of the piece in cm		
Type of support	Intermediate layers	≤ 1 31/32	≤ ≤ 11 13/16	> ≤ 11 13/16
Reinforced concrete, shotcrete/ gunite, factory walls	Plastering/mortar leveling	C1	C2	C2 S1
	Cementitious liquid waterproofing	C2	C2	C2 S1
	Liquid waterproofing with reactive resins	R2		
	Sheet membrane waterproofing	C2 S1		
Polyester or liner-bonded	-	R2		

¹ The adhesive must be specifically recommended by the manufacturer for swimming pools and vitreous mosaic.
² The reactive resin adhesive must be highly deformable.
³ They are sheets that allow their adhesion with cementitious adhesives without considering PVC and/or liners.
⁴ In the case of ceramic sheets, see the previous table.
⁵ Consult the manufacturer about the need for priming.
NOTE: In the case of pre-existing tiles, consult the manufacturer.

* In any case, it is advisable to check the manufacturer's technical specifications to ensure that the chosen adhesive and ceramic tile are suitable and compatible. For unique projects, it is advisable to consult the Technical Department of butech.

colorstuk rapid n

colorstuk rapid n is a type CG2 FWA high-performance, cement-based grouting material as per EN 13888, for grouting joints up to 15 mm - 11/4". Suitable for all kinds of ceramic tiles and natural stone, it is specially recommended for outdoor applications and permanently damp environments .

A high-tech, fine grained colored mortar with fast setting and hardening times for grouting tile joints up to 15 mm - 11/4". Suitable for all kinds of ceramic tiles and natural stone. Indoors and outdoors.

Features:

- Cement-based, single-component, colored mortar.
- Fine texture mortar for grouting tile joints up to 15 mm - 11/4".
- Mortar with fast setting and hardening times.
- It prevents efflorescences.
- Excellent mechanical resistance.
- Resistant to heat and UV radiation.
- Frost-resistant.
- Waterproof mortar.
- Anti-mold action.
- Easy to apply and clean.
- Wide color range.
- Mixing water: colorstuk rapid n 0.26-0.34 GAL per 11 lb bag.*

Substrates:

- All usual substrates for ceramic tiles laying.

Recommended uses:

- Tile joints up to 15 mm - 19/32"
- Indoor wall and floor tiles.
- Outdoor floors and terraces.
- High traffic floor tiles.
- Floor tiles on radiant heating.
- Pools and damp environments.
- Outdoor wall tiles in facades.

Materials:

- Absorbent and non-absorbent ceramic tiles, including porcelain tiles.
- Tiles with mosaic-like patterns.
- Glass mosaic.
- Clay and terracotta tiles.
- Natural stone and marble not prone to staining.

colorstuk 0-4 n

colorstuk 0-4 n is a type CG 2 fine grain grouting material as per EN 13888, for grouting joints up to 4 mm - 3/16". It is easy to apply, resistant and color stable, and it is specially recommended for rectified tiles.

A high-tech, fine grained colored mortar for grouting tile joints from 0 to 4 mm - 3/16". Suitable for all kinds of ceramic tiles and natural stone. Indoors and outdoors.

Features:

- Cement-based, single-component, colored mortar.
- Fine texture mortar for grouting tile joints up to 4 mm - 3/16".
- Easy to apply and clean.
- Resistant to heat and UV radiation.
- Frost-resistant.
- Wide color range.
- Mixing water:
colorstuk 0-4 n white 0.45 GAL per 11 lb bag.*
colorstuk 0-4 n color 0.34 GAL per 11 lb bag.*

Substrates:

- All usual substrates for ceramic tiles laying.

Recommended uses:

- Tile joints up to 4 mm - 3/16".
- Indoor wall tile coverings. Specially recommended for rectified tiles.
- Indoor floor tiles, including public buildings.

In the following applications, replace mixing water by cl-stuk additive:

- Outdoor floors.
- High traffic floor tiles.
- Floor tiles on radiant heating.
- Pools and damp environments.

Materials:

- Absorbent and non-absorbent ceramic tiles, including porcelain tiles.
- Glass mosaic.
- Natural stone and marble not prone to staining.

In the following applications, replace mixing water by cl-stuk additive:

- Wall tiles with mosaic-like patterns.
- DQS slabs and other kinds of marble agglomerate.

colorstuk especial n

colorstuk especial n is a type CG 2 very fine grain grouting material as per EN 13888, for grouting joints up to 4 mm. Its formula includes ultrafine aggregates, which make it specially recommended for tiles with a glaze sensitive to scratching.

A high-tech, fine grained colored mortar for grouting tile joints up to 4 mm - 3/16". Specially recommended for grouting rectified ceramic tiles sensible to scratching. and ceramic parquet flooring

Features:

- Cement-based, single-component, colored mortar.
- Ultrafine aggregates formula.
- Fine texture mortar for grouting tile joints up to 4 mm - 3/16".
- Easy to apply and clean.
- Resistant to heat and UV radiation.
- Frost-resistant.
- Wide special colors range.
- Mixing water: colorstuk especial n 0,17 GAL per 4.4 lb bag*

Substrates:

- All usual substrates for ceramic tiles laying.

Recommended uses:

- Tile joints up to 4 mm - 3/16".
- Ceramic tiles with low hardness glaze as per Mohs scale.
- Indoor wall tile coverings. Specially recommended for rectified tiles.
- Indoor floor tiles, including public buildings.

In the following applications, replace mixing water with cl-stuk additive:

- Wall and floor tiles into direct contact with water.
- Floor tiles on radiant heating.

Materials:

- Absorbent and non-absorbent ceramic tiles.
- Ceramic tiles with special finishes.
- Glass mosaic.
- Natural stone and marble not prone to staining.
- Do not use on polished materials.

In the following applications, replace mixing water by cl-stuk additive:

- Wall tiles with mosaic-like patterns.
- DQS slabs and other kinds of marble agglomerate

cl-stuk

cl-stuk is a latex which mixed with cement-based grouts like colorstuk, reduces water absorption and enhances mechanical resistance and deformability. Specially recommended when laying ceramic outdoors and in permanently damp environments.

A latex additive that can be mixed with the colorstuk range of high-tech grout mortars in cases when increased mechanical resistance, reduced water absorption or improved flexibility is required.

Features:

- Water-based acrylic resins latex.
- Resistant to the most common chemicals.
- It reduces mortar water absorption.
- It enhances the adherence and deformability of the grouting material.
- It increases resistance to abrasion.
- Excellent resistance to UV rays and the effect of heat.
- Frost-resistant.

Recommended uses:

Specially recommended in:

- Outdoor floor and wall tiles.
- High traffic floor tiles.
- Floor tiles on radiant heating.
- Pools and damp environments.

It enhances grouting material performance in:

- Indoor wall tile coverings. Specially recommended for rectified tiles.
- Indoor floor tiles, including public buildings.

Coverage:

Product	%	Gallons	Lb/bag
colorstuk 0-4 n white	34 %	0,45	11
colorstuk 0-4 n colour	26 %	0.34	11
colorstuk especial n	32 %	0,17	4.4

Materials:

Specially recommended in:

- Wall tiles with mosaic-like patterns.
- DQS slabs and other kinds of marble agglomerate.

It enhances grouting material performance in:

- Absorbent and non-absorbent ceramic tiles, including porcelain tiles.
- Glass mosaic.
- Natural stone and marble not prone to staining.

epotech aqua

epotech aqua is a new line of epoxy putties for grouting tile joints. Two-component epoxy putty with no organic solvents. It is waterproof, it has outstanding chemical and mechanical properties and it is easy to apply. Specially recommended for application on mosaics and ceramic tiles with relief.

This material is suitable for grouting joints from 0 to 25/64" (0 to 10mm) in floor and wall tiles, indoors and out. Excellent resistance to chemicals. Suitable for pools and permanently damp environments. Suitable as high adherence grouting material for ceramic tiles with any absorption level and format, for glass mosaic or natural stone.

Features:

- Two-component colored epoxy putty.
- Easy to apply and clean. This product is free of organic solvents and plasticizers
- Excellent joint color stability.
- Resistance to most chemicals and alkali, even in high concentrations.
- Waterproof joint, no water absorption.
- Excellent adherence and mechanical resistance.
- Tile joints up to 25/64" (10 mm).
- Wide color range.

Recommended use:

- Tile joints with uniform color and shade, resistant to the passing of time.
- Floorings with built-in heating.
- Pools and damp environments.
- High traffic floor tiles
- Outdoor floorings protected against the presence of rising moisture
- Floorings and wall coverings in direct contact with chemicals. See technical sheet.

Substrates:

- All usual substrates for ceramic tiles laying.

Coverage:

- See the grouting materials table on page 136

Materials:

- Absorbent and non-absorbent ceramic tiles, including porcelain tiles.
- Tiles with mosaic-like patterns. Please refer to PORCELANOSA catalogues.
- Glass mosaic.
- Natural stone and marble not prone to staining.

epotech nature

epotech nature is a new micro grain porcelain grout for the sealing of joints in ceramic tiles with designs inspired by nature. It has been specially developed for porcelain tiles that reproduce the appearance and texture of wood, such as PORCELANOSA Group's PAR-KER. Professional use.

This material is suitable for grouting tile joints up to 0 to 25/64" (0 to 10mm). in floorings and wall coverings, both indoors and outdoors. Excellent resistance to chemicals. Suitable for pools and permanently damp environments. Suitable as high adherence grouting material for ceramic tiles with any absorption level and format, for glass mosaic, or natural stone.

Characteristics:

- Two-component colored epoxy putty.
- Easy to apply and clean. This product is free of organic solvents and plasticizers.
- Excellent joint color stability.
- Resistance to most chemicals and alkali, even in high concentrations.
- Waterproof joint, no water absorption.
- Excellent adherence and mechanical resistance. Hypoallergenic and bacteriostatic.
- Tile joints up to 10 mm.
- Wide range of colors inspired by natural woods.

Recommended use:

- Floorings and wall coverings in natural wood-inspired ceramics.
- Tile joints with uniform color and shade, resistant to the passing of time.
- Floorings with built-in heating.
- Pools and damp environments.
- High traffic floor tiles
- Outdoor floorings protected against the presence of rising moisture
- Floorings and wall coverings in direct contact with chemicals. See technical sheet.

Substrates:

- All usual substrates for laying ceramic tiles.

Coverage:

epotech crystal

epotech crystal is an epoxy putty for grouting tile joints. Two-component putty with a translucent finish. It reflects the color of the tile or mosaic surrounding the joint. It features all the properties of epoxy putties: watertightness, high resistance to chemicals and mechanical properties. Specially recommended for application on mosaics and ceramic tiles with relief. Extra fine, micro grain porcelain grout.

This material is suitable for grouting joints up to 13/64” (5 mm) in floor and wall tiles indoors. Excellent resistance to chemicals in high concentrations. Suitable for permanently damp environments.

Certifications/Standards:
EN 13888 RG

Features:

- Extra fine, micro grain porcelain grout.
- Easy to apply and clean epoxy putty.
- Translucent appearance.
- High resistance to most acids and alkali, even in high concentrations.
- Waterproof joint, no water absorption.
- Excellent adherence and mechanical resistance.
- Prevents the development of fungi and bacteria.
- Tile joints up to 13/64” (5 mm).

Recommended uses:

- Wall and floor tiles with minimum joint.
- Indoor floor and wall tiles.
- Mosaic or natural stone wall coverings.
- Wall tiles and mosaics with glass elements.
- PAR-KER floor coverings.
- Technical, porcelain floor coverings.

Substrates:

- All usual substrates for ceramic tiles laying.

Coverage:

- See the grouting materials table on page 136

Materials:

- Absorbent and non-absorbent ceramic tiles, including porcelain tiles.
- Glass mosaic.
- Wall tiles and mosaics with glass elements.
- Natural stone and marble not prone to staining.

s-107 n

s-107 n is a neutral silicone putty for sealing joints. Specially recommended for sealing movement joints. Indoor and outdoor use.,

This putty crosslinks in contact with dampness and does not give off odors, thus becoming an elastomer highly elastic and resistant to atmospheric agents.

Features:

- Single-component neutral silicone.
- High elasticity.
- Good adherence.
- Resistant to UV rays.
- Frost-resistant.

Recommended uses:

- Sealing joints even between materials sensible to chemical attack.
- Sealing movement joints in floors and walls.
- Sealing joints in ceramics, glass, metal and plastics.
- Sealing perimeter joints in wall tile coverings.
- Gluing ceramic materials on wood boards.

Substrates:

- All usual substrates for ceramic tiles laying.

Coverage:

p-404

p-404 is polyurethane putty for sealing joints. Specially recommended for sealing movement joints outdoors. Indoor and outdoor use.,

This reticular putty in contact with dampness does not give off odors, thus becoming an extraordinary adherent, elastic and resistant elastomer to atmospheric agents.

Features:

- Single-component polyurethane putty.
- High elasticity.
- High adherence.
- Resistant to UV rays.
- Frost-resistant.

Recommended uses:

- Sealing joints even between materials sensible to chemical attack.
- Sealing movement joints in floors and walls.
- Bonding of building materials like ceramics, concrete, roof tiles, wood, aluminum, polyester or PVC.
- Gluing ceramic materials on metal or wood boards.
- Gluing Concept XPS panels.

Substrates:

- All usual substrates for ceramic tiles laying.

Coverage:

self-leveling spacers

Leveling system for ceramic tiles. Eases ceramic tile laying and guarantees a perfectly flat surface of the final installation. The system consists of a new type of spacer with adjustable height that levels the surrounding tiles and prevents them from moving.

Specially recommended when tile, design or use features demand a perfect finish, with an even, seamless surface.

Features:

- Guarantees tiles are even.
- Prevents tiles from moving due to laying errors or due to mortar setting.
- Reduces retouching and laying times.
- Suitable for 0" to 13/64" (0.5 to 5mm) wide joints.
- Suitable for floor and wall tiles of thickness between 9/32" to 19/32" (7-15 mm). For thinner tiles use the supplementary lifting pieces
- The system consists of a spacer, a wedge and an adjusting tool.
- Wedges are recoverable, only the spacers are consumed.

Substrates:

- All usual substrates for ceramic tiles laying.

Recommended uses:

- Wall and floor tiles with minimum joint.
- Large format floor tiles.
- Laying of rectified wall tiles.
- Tiles with reduced thickness: XLIGHT and XTONE
- Interlocking floor designs.
- Glued facades.
- Essential to place the ceramic by the method of thin layer and double gluing of the pieces

Materials:

- Before using the self-leveling spacers system, carry out a preliminary test with the type of wall or floor tiles to be installed and check that the tile is not damaged during the removal of the spacer, especially in textured or rectified tiles without bevelling and mosaics with 3D texture

super-prim

super-prim is a water-based acrylic resin primer with silica arids, used for preparing substrates prior to using adhesives, self-leveling mortars and mortar screeds. It reduces water absorption and improves the consistency of cement-based substrates. Professional use.

Features:

- Water-based, acrylic resin latex with silica arids.
- It enhances the adherence of cement mortars on glazed wall coverings.
- It improves the bonding material setting time.
- It reduces substrate water absorption.
- It increases cohesion of the substrate.
- Easy application with a paint roller or a wide paint-brush. Can be applied with airless spray.
- Indoor and outdoor use.
- Do not dilute with water or mix with any other liquids.

Recommended uses:

- Primer for self-leveling mortars on highly absorbent or existing ceramic tile coverings.
- Ceramic tiles on cement-based substrates with weak consistency or existing ceramic tile coverings.
- Ceramic floor coverings on anhydrite substrates or ceramic wall coverings on plaster or molding plaster.
- Mortar screeds on brick partition walls or concrete block walls.
- Mortar screeds on ceramic tile or natural stone floors.
- Do not use in substrates subject to dampness increases.

Substrates:

- Ceramic brick partition walls.
- Cement covered floors and walls.
- Concrete slabs and aerated concrete blocks.
- Anhydrite-covered floors and plastered walls.
- Indoor ceramic floor and wall tiles.
- Indoor wood boards.
- Indoor metal sheets.

Coverage:

Substrate	Coverage
Self-leveling floors	3lb (1.4 kg) per m ² and thickness millimeter

Before using this product in any application not indicated in this catalogue, please perform a test or refer to the product's technical sheet.

level 3

level 3 is a fast hardening, self-leveling mortar with fibres for leveling and regularizing substrates for all kinds of floor tiles. 3 mm-1/8" to 30 mm-1 1/4" thickness. Specially recommended for laying ceramic floor tiles with a minimal joint indoors.

It is formulated for creating 3 mm-1/8" to 30 mm-1 1/4" floor substrates. It features good workability, fast-setting times, and a high mechanical performance. It allows to prepare floors well levelled, for a correct and quick fixing of rectified ceramic tiles.

Features:

- Compressive strenght ≥ 3625 psi
- Flexural strenght ≥ 725 psi
- Single-component, self-leveling mortar
- Excellent adherence. Flexible
- High fibre content
- Application thickness between 3 mm-1/8" to 30 mm- 1 1/4"
- Easy application with a straight edge trowel or scraper
- Indoor use
- Mixing water: 4 qts per 56 lb bag

Recommended uses:

- Indoor large format floor tile coverings.
- Indoor large format rectified floor tile coverings.
- Indoor floor tile coverings with a 1 mm-1/32" joint.
- Floor tiles with radiant heating.

Substrates:

- Cement-based substrate, previously apply **uniprim**.
- Glazed ceramic tiles and wood substrates, previously apply **super-prim**.

Materials:

- Large format floor tiles.
- Porcelain tiles (water absorption < 0.5% as per EN-ISO 10545-3).
- Natural stone and marbles.

acid net 0.26US gal lqd (1L)

acid net is an acid detergent for cleaning ceramic floor and wall tiles. It dissolves all kinds of cement debris without damaging coverings or cement based joints like colorstuck.

Recommended uses:

- Cleaning of remains of adhesives and cement-based grouting materials in floor and wall tiles
- Cleaning of efflorescences and salts remains.
- Cleaning of plaster remains and plaster-based remains.
- Cleaning of lime remains and film.
- Cleaning of glazed substrates prior to laying new tiles.

Coverage:

Dilution 1: 1 with clear water	0.19-0.22 lb (90-100) gr/m²
Dilution 1: 2 with clear water	0.09-0.11lb (45-50) gr/m²

Given the wide range of mosaics and ceramics, it is recommended to consult the supplier of tiles about the chemical resistance. In any case, it is recommended to take a test.

We recommend the use on cleaning polished tiles, also with metal finish. Contact the supplier of tiles to know the chemical resistance. In any case, you have to take a test.

*Given the wide variety of ceramic materials, glass mosaics and natural stones, we recommend to check with your tile provider about chemical resistance of the tiles before applying any cleaning product.

*Given the wide variety of ceramic materials, glass mosaics and natural stones, we recommend to check with your tile provider about chemical resistance of the tiles before applying any cleaning product.

Before using any cleaning product, please perform a test or refer to the product's technical sheet.

Before using any cleaning product, please perform a test or refer to the product's technical sheet.

butech protect

Flooring protection system using rigid polypropylene sheets resistant to impact, drag and medium/low-rate surface abrasion. The butech protect sheets are ideal for protecting ceramic, worktop and furniture floor tiles from other construction work and even adverse weather conditions. Reusable. Made from alveolar polypropylene, they are resistant to water and the most common products used in construction, such as cement, plaster or heavy-duty cleaning products.

Directions for use:

- Check that the surface to be protected is clean, dry and does not present any type of damage. In the case of floor tiles, check that the joint is dry and has no surface moisture.
- Place the butech protect sheets until the entire flooring surface is covered.
- Attach the sheets together using butech protect adhesive tape. Before applying the adhesive tape on any surface, especially if it is wood, check that the tape does not stain it.
- Rethink the distribution of sheets based on the space to be protected. When accessing any of the protected areas is needed, cover it with a removable panel.
- Mark the protected area indicating that extreme care must be taken, both in human traffic and in the work to be carried out in the area. In the case of countertops or kitchen cabinets, indicate that it is a fragile item, prohibit any item from resting or being used as a work table.
- Indicate the presence of fragile or scratch-prone items, especially glass and electrical appliances.
- If there is a spill or permanent build-up of debris, clean up, remove the butech protect sheets, clean and dry the floor and then cover again.
- After completing the works, remove the adhesive tape, pull back the butech protect sheets and store them away for future jobs.

Recommended uses:

- Protection of flooring in general, both indoors and outdoors.
- Protection of polished ceramic floor tiles.
- Protection of glaze-finish ceramic floor tiles.
- Protection of gloss-finish ceramic floor tiles.
- Protection of worktop and furniture.

Coverage:

- 2,8 m²/individual sheet
- 15,5 m²/kit (5 sheets + cover)

Specifications of individual sheet:

Folded sheet size	70 x 100 cm
Unfolded sheet size	140 x 200 cm
Dimensional tolerance (length)	+/- 3 mm
Sheet thickness	2 mm
Thickness tolerance	+/- 0.2 mm

SHOWER DECK SYSTEM

shower deck system

New shower tray concept with concealed drain for the most exclusive bathrooms. This innovative shower tray system lets us create a sense of continuity with the rest of the bathroom floor because the slopes are concealed under the floor. Drainage is achieved through the open joints and does not require the installation of an evacuation grid.

The **shower deck system** is a shower tray made up by a polyurethane base coated with thermoset polymers, especially designed to to have ceramic plates installed. Polyurethane base coated with thermoset polymers. Specially recommended for bathroom renovations.

Features:

- Flat shower tray without slopes.
- Polyurethane base coated with thermoset polymers.
- Drain concealed from sight.
- Ultra-slim shower tray; only 30 mm- 1 1/4" in height.
- Easy to clean and high resistance to domestic-use detergents.
- Virtually no maintenance, especially compared with wooden floors.
- Thermal insulation.
- Easy installation and assembly.

Installation:

- Concrete floor slabs.
- Cement covered floors.
- Wood flooring.

Recommended use:

- Shower trays and cabins in designer bathrooms.
- Shower trays in public buildings.
- Applications where it is necessary to eliminate architectural barriers.
- Accessible bathrooms.

Materials:

- Anti-slip porcelain tile plates.
- STON-KER antislip
- PAR-KER antislip
- STARWOOD antislip
- URBATEK antislip

SHOWER TRAYS AND WATERPROOFING

XPS MODULAR NICHES

XPS Modular Niches

Prefabricated modules for the creation of niches in bathrooms and wet areas for shampoo or shower gel.

Made from concept panels with a waterproof XPS foam core and perimeter-sealed with a waterproof sheet, they are easy to install quickly and precisely, without the need for “in situ” construction. With Butech’s **XPS modular niches**, shelves and all kinds of spaces can be created in shower cabins and bathrooms, protected against water infiltration and ready to be finished with mosaic or ceramic coverings. Suitable for both public and private use.

Butech’s **XPS modular niches**, are suitable for installation on brick and concrete block walls as well as drywalls, where studs may need to be installed to secure these modules. In all cases, **XPS modular niches**, will be perfectly adhered with adhesive or mechanically anchored to a weight-resistant support used in the niches. Thanks to the waterproof sheet factory-mounted around the niche’s 10 cm perimeter, secure sealing of joints between the niche and the wall is guaranteed.

Features:

- Made of extruded polystyrene panels coated on both sides with waterproof cement mortar.
- 10 cm wide waterproof perimeter ensures the sealing of joints between niche and wall.
- Non-absorbent material, its structure prevents water accumulation. Resistant to moisture.
- Fire-resistant material: Class E.
- Excellent surface for placing ceramics, compatible with cement-based adhesives.
- Easy and quick installation.

Recommended applications:

- Interior wall decoration covered with ceramic tiles or natural stone mosaics in direct contact with water.
- Interior wall decoration.
- Bathrooms and shower cabins.
- Spas and wet areas in general.

Supports:

- Ceramic brick partitions and concrete block walls.
- Drywall over battens with gypsum board and cement board panels.

Materials:

- All types of ceramic tiles.
- Mosaics.
- Natural stones.
- Plaster finishes and cement mortars.

XPS concept panels

XPS concept panels are extruded polystyrene panels ready for laying wall tiles, mosaics or natural stone with cement-based adhesives. Polystyrene lightness and easy handling, as well as its mechanical resistance and damp resistance make of this panel the perfect substrate for all kinds of environments where damp is present.

This kind of panel is available in thicknesses ranging from 4 to 80 mm and also in special precut boards that allow for a fast installation of curved shapes.

Features:

- Extruded polystyrene boards covered on both sides with waterproof cement mortar.
- Non-absorbent material. Its structure prevents water buildup. Resistant to dampness.
- Excellent surface for laying rectified tiles.
- Low thermal conductivity coefficient.
- Good soundproofing against impact noise.
- Easy handling and transport.
- Quick and clean installation.
- Resistant to microorganism attack.
- Inert and non-hazardous material made with 50% to 70% recycled material.
- Fire resistant: B1 as per DIN 4102.

Substrates:

- Usual indoor substrates in the building industry.
- Uncovered brick partition walls.
- Concrete floor slabs.
- Existing wall and floor tiles.
- Self-supporting indoors. Only 50 and 80 mm boards.

Recommended uses:

- Preparation of substrates for ceramic tiles laying. Specially recommended in refurbishing jobs.
- Bathroom countertops and vanities in permanently wet areas.
- Bathroom partition walls and platforms.
- Bathtub skirts and shower cabins.
- Shelves and panels attached to partition walls.
- Health resorts, saunas and spa premises.
- Thermal insulation of electric radiant heating floors.

Materials:

- Absorbent and non-absorbent ceramic tiles. Porcelain tiles with a water absorption < 0.5% as per EN-ISO 10545-3.
- Glass mosaic.
- Natural stone and marble not prone to staining.

CONCEPT XPS SHOWER TRAYS

concept XPS shower trays

It is a prefabricated system for creating built in shower trays. They include the slopes for the correct water drainage, as well as the drain and the waterproofing system. This system is supplied ready to use, which reduces working times while guarantees a perfect substrate for laying mosaic, natural stone or ceramics.

concept xps shower tray is light, resistant and safe, reason why it is specially recommended in bathroom refurbishing jobs. It includes imperband kit as a drain, but it does not include the decorative grating, so you can choose among a wide range of sizes, shapes and finishes.

Features:

- Prefabricated shower tray made of extruded polystyrene covered with **imperband eco** sheet.
 - It includes slopes for water drainage.
 - The shower is supplied in two pieces that fit with the sump adjustment piece.
 - It includes imperband kit for waterproofing the shower tray and the adjustment piece.
 - Minimum system height:
 - Reburbing drain: between 57 and 75 mm
 - Standard drain: between 77 and 95 mm
 - Available for square as well as for linear drains.
 - Not include the decorative grate.
-
- | | | |
|--------------------------|------------|----------------------|

imperband USA kit

The **imperband USA kit** is an indoor waterproofing system consisting of a PVC gutter thermowelded to a 40"x 40" (100 x 100 cm) waterproof sheet. Specially recommended for waterproofing shower trays in new building works. Residential use.

The waterproof sheet is an imperband type 1/64" (0.5 mm) thick polymer membrane with a double thermoplastic polyolefin sheet and covered on both sides by non woven polyester fibre that allow it to be bonded to surfaces using cement-based adhesives. The gutter features a compact design and multiple possibilities of outlet connections.

Features:

- Maximum security, it eliminates leakage risks between waterproof sheet and drain piece.
- 40"x 40" (100x100 cm) waterproof sheet.
- Discharge speed. 0.5 l/s.
- Compact system, just 100 mm · 4" high.
- Includes u-bend.
- Direct installation of the tile on the waterproof sheet.
- Quick and easy application.

Recommended use:

- Specially designed for waterproofing built in showers.

Installation:

- Build the slopes with concrete or use prefabricated concept XPS shower trays
- Before laying the ceramics of the shower tray, check that the gutter works correctly.
- Use the waterproof sheet in the same way as the imperband sheet.

Materials:

- Absorbent and non-absorbent ceramic tiles. Porcelain tiles with a water absorption < 0.5% as per EN-ISO 10545-3.
- Glass mosaic.
- Natural stone.

Substrates:

- Wooden floors
- Cement covered floors.
- Concept XPS shower trays, prefabricated polystyrene panels.

imperband USA kit installation

This waterproofing kit has been developed to be installed with latex modified mortar using the thin set method.

1. Connection with the drainpipe.
Connect the outlet to the drainpipe.

2. Check the drain watertight.
Slop water through the drain and check the outlet works properly. Protect the drain in order to avoid the entrance of remains.

3. For application of cement based mortar.
Cover the shower base mortar until the drain upper level (up to the membrane) and the finished floor of shower area shall slope uniformly from the sides toward the drain not less than ¼ inch per foot (20.9mm/m), nor more than ½ inch per foot (41.8mm/m). Let it dry. Check if the drain upper part plus coating are at the desired base level.

4. Shower tray base waterproofing.
Once the substrate is dry, use a latex modified mortar and spread it with a 1/4 inches notched trowel.

5. Waterproof sheet fixing.
Cut the waterproof sheet according to the shower tray area, leaving enough membrane in order to cover 4 inches over each wall. Lay the waterproof sheet and press it over the adhesive yet wet without forming air bags.

6. Shower tray angles waterproofing
On corners, fold the membrane so that it covers the whole line between the wall and the shower tray. In case it is needed to lay the waterproofing on both wall and floor, overlap at least 4 inches with Imperband membrane (indoors waterproof sheet).

NOTICE:
The kit imperband shower system has been approved by IAPMO to meet the criteria of ANSI A118.10 and is in compliance with the following standards: IAPMO IGC 195-2013a and ASME A112.18.2-2011 / CSA B125.2-11. To obtain this certificate, the design of the product was adapted as follows:

- The grate does not include thread, allowing its installation near the wall but without affecting the stability or waterproofness of the system. No sealing is required between the connection of the kit imperband and the linear grate.

Should you have any questions please contact your PORCELANOSA representative.

Before using this product in any application not indicated in this catalogue, please perform a test or refer to the product's technical sheet.

Squared drains

7 (B). Insert the grate
Insert the grate by pushing until you hear "click".

8 (B).
Use the puller hook or an screwdriver to lever the grate out from the drain frame.

Linear drains

7(A). Grate frame installation
The linear drain outlet does not include thread which allows installations near to the wall but without affecting the stability or waterproofness of the system. Because of this, once installed the linear drain outlet does not have to be fully fitted in the drain pipe but no sealing is required between the connection of the KIT IMPERBAND and the linear drain outlet.

8(A). Tiling material installation.
Install the ceramic tiles over the membrane using the thin set method. You can use the recommended mortar to install the ceramic tiles.

9. Install the grate inside the linear drain.
Insert the grate by pushing hard. Push on both sides of the grate as shown on the picture until the grate is completely integrated into the channel. In the case of tileable ceramic grate (linear ceramic grates), just cut a piece of ceramic exactly the same size of the grate adhere the piece of ceramic directly to the grate (the grate has a membrane fleece to receive the tile).

10.
Use the puller hook to pry in to the grate. To pry with the puller hook in one side of the grate will need less effort.

Before using this product in any application not indicated in this catalogue, please perform a test or refer to the product's technical sheet.

imperband eco

imperband eco is a waterproof sheet made of recycled material specially designed for indoor waterproofing of ceramic wall and floor coverings.

It is a 0,5mm thick polymer membrane with a double thermoplastic polyolefin sheet and covered on both sides by non woven polyester fibers that allow it to be bonded to surfaces using cement-based adhesives. Ideal for use in new construction and refurbishment of showers and baths, and any indoor environment permanently affected by damp.

70 % 

Features:

- **70% recycled material.**
- Double thermoplastic polyolefin membrane covered on both sides by non woven polyester fibers.
- Maximum waterproofing with minimal thickness (0.5 mm).
- Direct installation of the tile on the sheet.
- Good chemical resistance.
- Quick and easy application.

Installation:

- **imperband eco** sheet is compatible with type C2 cement-based adhesive as per EN 12004.
- In case of surfaces bigger than the length of the sheet, overlap two 10 cm sheets and bond with C2 adhesive.
- In waterproofing of floors, leave an excess of sheet of at least 10 cm in all the spots where floor meets the wall.
- Be extremely cautious when connecting the sheet to the drainage systems.
- Once the **imperband eco** sheet has been installed, cover with the chosen floor covering. Never leave exposed to direct sunlight.

Recommended use:

- Private bathrooms. Built in showers.
- Public toilets and showers.
- Spas and premises in permanently damp environments.
- Balconies and terraces smaller than 10 m².
- Do not use in outdoors surfaces greater than 10 m².

Materials:

- Absorbent and non-absorbent ceramic tiles. Porcelain tiles with a water absorption < 0.5% as per EN-ISO 10545-3.
- Glass mosaic.
- Natural stone and marble.

Substrates:

- Cement covered floors and walls .
- Concrete slabs.
- Plasterboards.
- On anhydrite or plaster substrates apply **uniprim**, previously to the cement based adhesive

sylastic Premium

sylastic Premium is a single-component cementitious waterproofing material with excellent adhesion and deformability, both under positive and negative pressure. Compatible with type C2 cementitious adhesives according to EN 12004, it can be used to waterproof substrates prior to installing tiles. Indoor and outdoor use.

It avoids the need for screeds between the waterproofing and the tile, which reduces the thickness of the system. Application is done in two successive coats with a total thickness of at least 2 mm. Special pieces and bands are available for waterproofing joints and other critical points.

Features:

- Single-component waterproofing mortar
- Waterproofing for both positive and negative hydrostatic pressure
- Waterproofing of interiors and exteriors
- Maximum waterproofing with the minimum thickness (2 mm)
- Suitable for direct installation of tiles with cementitious adhesive
- Excellent adherence and maximum deformability
- Permeable to water vapor, prevents moisture condensation
- Suitable for direct contact with water
- Mixing water: 7.60US pt lqd (3.6 L) per 33lb (15kg) bag

Materials:

- Absorbent and non-absorbent tiles. Porcelain stoneware (water absorption <0.5% according to EN-ISO 10545-3)
- Glass mosaics
- Natural stones and marbles

Coverage:

- Waterproofing:
 - First layer: > 4lb (2Kg) /m²
 - Second layer: > 2lb (1Kg) /m²
 - Total waterproofing: > 6lb (3Kg) /m²
- Sylastic Premium total minimum thickness: 5/64" (2mm)
- Coverage per millimetre of thickness of sylastic Premium: 3lb (1,5 Kg) /m²

1 Substrate 2 Adhesive 3 lamitech n 4 Self-leveling spacers 5 Grout 6 s-107 n 7 imperband

butech anti-cracking mat

Decoupling sheet for floors undergoing low and medium movements.

It reduces the transfer of tensions and stresses between the substrate and the flooring, protects the flooring against the appearance of cracks in the substrate or sideways movements between the slabs forming the substrate and allows ceramic or natural stone flooring to be laid on substrates and structures with medium and low movements such as wooden panels.

Features:

- Closed-cell elastomer sheet coated on both sides with non-woven fibers that allow cement-based adhesives to be anchored.
- It allows for direct laying of ceramic tiles with cement-based adhesive types C2 S1 according to EN 12004.

Color: White
Roll dimensions: 161 sqft / 49ft x 3.3ft
Roll weight: 27 lb/roll
Sheet thickness: 1/16"
Sheet density: 0.10 lb/sqft

Final use:

- Indoor floor tile coverings
- Residential and public concurrence floor coverings with pedestrian traffic
- Floor coverings for commercial or industrial use with mechanical requirements, even with wheel circulation
- Floors with built-in heating
- Suitable for floor renovations

We do not recommend the use of butech anti-cracking mat in:

- Walls
- Supports exposed to bending movements
- On structural joints or movement joints of the support

Materials:

- Stoneware and porcelain stoneware floors, even large formats.
- Natural stones and marbles, even large formats.

The use of butech anti-cracking mat is not recommended:

- Chemically resistant floor coverings
- Under parquet floors

lamitech n

lamitech n is a multilayer polymer sheet, specially designed for outdoor floors decoupling. Protects tiles against substrate tensions, reducing the risk of breakage and piece lifting. Suitable for outdoor waterproofing.

Coextruded HDPE/EVAC membrane, with one side covered with polyester fibers and the other one with polyester entwined felt, that allows laying with cement-based adhesives. Absorbs tensions, reducing their transmission to the ceramic floor. Indoor and outdoor use.

Features:

- Multilayer HDPE/EVAC polymer membrane covered with polyester fibers.
- Maximum outdoors waterproofing with minimal thickness (3.4 mm - 9/64").
- It allows for direct laying of ceramic tiles with cement-based adhesive.
- Good chemical resistance.
- Improves impact noise reduction.
- Quick and easy application.

Installation:

- **lamitech n** sheet is compatible with type C2 cement-based adhesive as per EN 12004.
- Place sheets side by side, without overlappings. In case of using it as waterproofer, proceed to sealing sheet joints with **sylastic** waterproof mortar and **lami-band 200** waterproof band..
- In waterproofing of floors, lengthen the waterproofing with **lami-band 200** at least 10 cm-4" in all the spots where floor meets the wall.
- In movement joints, use flexible tape waterproof band.
- Be extremely cautious when connecting the sheet to the drainage systems.
- Once **lamitech n** has been installed, lay the chosen floor with compatible adhesives. Never leave exposed to direct sunlight.

Materials:

- Absorbent and non-absorbent ceramic tiles. Porcelain tiles with a water absorption < 0.5% as per EN-ISO 10545-3.
- Glass mosaic.
- Natural stone and marble not prone to staining.

Recommended use:

- Decoupling of balconies and terraces.
- Waterproofing of outdoor floors.
- Laying of ceramics on wood substrates.
- Laying of floor tiles on cracked substrates. Terrace refurbishing.
- Laying of ceramics on substrates which are not set yet or present residual damp.

Substrates:

- Cement or anhydrite covered floors.
- Concrete slabs.
- Existing floor tiles.
- Plywood boards.

pool-deck

Drainage system for pools and terraces covered with porcelain tiles. This new water collection channel system is prepared to receive PORCELANOSA Grupo tiles and allows water to drain through the open joints between them. Compatible with any exterior waterproofing system, pool-deck replaces the traditional metal or plastic grates, completely changing the finish and durability of any outdoor flooring.

Available for 7 19/32" (19.3cm) wide tile pieces. Professional system.

Features:

- Drainage through the open perimeter joint around the tile pieces. Drain joint width: 9/32" (7mm)
- Compatible with all butech exterior waterproofing systems: sylastic and lamitech n
- Compact; only 55 mm thick channel plus tile
- Light system, only 19lb (9 kg) /m²
- High compressive strength: 2000 kpa

Recommended use:

- Drainage of interior and exterior flooring.
- Private and public showers.
- Terraces and pools
- Especially recommended for the following formats:
 - PAR-KER 7 19/32" x 70 55/64" (193 x 1800 mm)

Supports:

- Cement mortar screeds

Materials:

- Non-slip porcelain tile pieces
- STON-KER antislip
- PAR-KER antislip
- URBATEK antislip

pool-deck complements

pool-deck channel: 37' 13/32" (95cm) long channel with internal V-slope, which includes heat-sealed imperband waterproofing sheet over the eaves of the channel.

pool-deck adjustment Channel: Adjustment piece of different length measurements with internal V-slope, which includes heat-sealed imperband waterproofing sheet over the eaves of the channel. To complete the measurement required by the installation, these pieces will be available in the following measures: 529/32" (15cm), 9 27/32" (25cm), 13 25/32" (35cm), 17 23/32" (45cm), 21 21/32" (55cm), 25 19/32" (65cm), 29 17/32" (75cm) and 33 15/32" (85cm).

pool-deck drain: Drain piece with internal V-shaped slope, which includes imperband waterproofing sheet heat-sealed over the eaves of the channel and a special drain designed for this system that withstands high pressures and is resistant to products commonly used in swimming pools.

pool-deck corner: Corner piece with internal V-slope, including imperband waterproofing sheet heat-sealed over the eaves of the channel.

pool-deck corner drain: Corner drain piece with internal V-slope, which includes heat-sealed imperband waterproofing sheet over the eaves of the channel and a special drain designed for this system that withstands high pressures and is resistant to products commonly used for swimming pools.

pool-deck side: Channel closure / start terminal that includes heat-sealed Imperband waterproofing sheet over the eaves of the channel.

Raised Access Floor for Exterior

The outdoor Raised Access Floor is a construction system specially designed for outdoor use that allows to raise the floor and compensate the slope of the substrate on which it is installed by providing a perfectly level walking surface.

Components

Our outdoor raised access floor is composed of ¾” thick porcelain tiles or a double porcelain tiles, height-adjustable polypropylene pedestals with rubber coating on the head, compensating discs, polyurethane adhesive (P-404), flexible wedges and polyurethane foam spray.

Benefits:

1. Optimal water drainage during rain or cleaning.

2. Panels can be lifted anytime, granting permanent access to the subfloor.

3. Elements such as pipes are completely hidden under the panels.

4. Light system compared to the typical concrete pavers system.

5. Great acoustic insulation

6. Good thermal insulation created by the air chamber between the raised access floor surface and the roof.

7. No need for expansion joints.

8. Good mechanical resistance.

9. Flat and level finish. Slopes and drains are hidden.

*Continuous effect created by matching the height and tile finish inside and outside

Porcelain paver

THIC'KER 20 MM

The advances in manufacturing techniques and new landmark frontier technology brought the possibility of producing porcelain tiles in a much greater thickness as traditionally, enabling these tiles to be used for exterior structural paving applications. Our high performance 3/4" thick tiles offer an extraordinary load-bearing strength and hard-wearing resistance combined with an outstanding aesthetic appearance and anti-slip finish. They are ideal for any commercial or residential project and suitable for rooftops, terraces, patios, decks, balconies, plazas and walkways. Additionally we also provide these tiles with a continuous groove for use with our wind-uplift resistant system.

Porcelain laminated

Double Porcelain Tile

This exclusive and unique product is the ultimate solution for outdoor raised floor projects providing trendsetting cuttingedge designs of unparalleled beauty and refinement. These double pieces are available in same size, color and finish than most of our porcelain tiles which enables the possibility of creating unbroken visual continuity between outdoor and indoor spaces in any residential or commercial project. Given its extreme wear and weather resistance, it is the perfect alternative to wood and stone that will remain absolutely unchanged over time. Its technical properties and design make it perfect for use with our wind-uplift resistant system. A 8,5mm or thicker anti-slip tile must be chosen.

Structure of outdoor RAF

Plots with adjustable height.

These plots, made of weatherproof plastic, are the support on which the ceramic tile of outdoor RAF rests. They determine the height of the system and width of the joint between panels. This element consists of the following parts:

- **Plot base:** Large diameter base that distributes the weight on the subfloor.
- **Stem:** Adjustable height rod that allows adapting height of the plot to the needs of the raised floor.
- **Head:** Where outdoor RAF tiles are laid. With 4 spacers that determine grout joints, with a width of 4 mm. Includes a rubber pad on top to reduce impact noise and vibrations.

Optional upgrades:

The Windproof version includes T-shaped(1) and L-shaped clips(2), fixing cap(3) and screw(4). Windproof system is capable to withstand winds up to 132 mph. Estimated weight 9.66 lbs per sq ft.

Pavers machined with kerf cuts at each corner in order to make them suitable for the windproof system.

Plots adjustables (plot n)

Type	Adjustable
Material	Polypropylene with mineral load
Colour	Black
Compression resistance	6172,943 pounds/unit approximately
Dimensions	Lower support base Ø 8 1/16" (205 mm) Upper head Ø 5 15/16" (150 mm)
Thread type	Double trapezoidal thread
Heights	Minimum 1 3/16" (30 mm) Maximum 26 3/8" (670 mm)
Slopes	From flat to 3 %
Separation between tiles	3/16" (4 mm)

How to install the outdoor RAF

1- Flooring layout

Determine the starting point. Make a estimation of the layout counting on 4mm joint between panels. Mark the position of the installation joints on the subfloor. Place the plots corresponding to the first panel. If necessary, cut the plots through the slots in the base with an angle grinder.

2- Installation technique

Adjust the height of the pedestal to level the panel. Arrange the first tile to confirm the distance between plots and remove it again. Determine the slope, arrange as many 1% stackable compensators as necessary to obtain a flat base (maximum 3 units) and glue with p-404.

3- Installing the perimeter

In the perimeter panels, break the spacers on the plot head in order to carry the panel to the edge of the flooring. Glue the perimeter panels to the plot head with p-404.

Where necessary, cut the ceramic tiles using a suitable disc and water-cooled cutting machine. When the flooring perimeter borders a rigid wall, seal the perimeter joint with polyurethane foam to prevent movement of the plots and panels. Cover the joint with the chosen skirting or baseboard. When the flooring perimeter is exposed and needs to be covered, butech can offer different solutions.

Place the plots on the 1% stackable compensators and glue to the support with p-404. Place again the first panel and adjust the height of the plot with the key so that the floor is flat and levelled. Continue laying the next panel in the same way, ensuring a perfect levelling.

System accessories: RAFX

End profile for RAFX

Butech's top profile is a solution to hide the aesthetic inconvenience that occurs when a step has to be made with the Raised Floor. This profile, in addition to hiding the edge of the ceramic piece, allows us to anchor a vertical piece to the plot to hide the body of the plots*

Made of aluminum, and with a length of 47 1/4" approx (1200mm), it can be used in thickened tiles (SAP: 100280081) with a 3/4" (20mm) depth, and in double-piece tiles (SAP: 100290783) with a 15/16" (23mm) depth. For a correct clamping of the vertical piece from its lower part, several units of the Lower Clip (SAP: 100253748) will be necessary. *Option valid only for **plot n.**

System accessories: RAFX

Vertical Enclosure Clip

Butech's top profile is a solution to hide the aesthetic inconvenience that occurs when a step has to be made with the Raised Floor. This profile, in addition to hiding the edge of the ceramic piece, allows us to anchor a vertical piece to the plot to hide the body of the plots*

Made of aluminum, and with a length of 47 1/4" approx (1200mm), it can be used in thickened tiles (SAP: 100280081) with a 3/4" (20mm) depth, and in double-piece tiles (SAP: 100290783) with a 15/16" (23mm) depth. For a correct clamping of the vertical piece from its lower part, several units of the Lower Clip (SAP: 100253748) will be necessary. *Option valid only for **plot n.**

The description of the Outdoor RAF panel refers only to the upper tile, which may differ from the lower tile in colour and aspect.

Cutting the 3/4" (20mm) thick Outdoor RAF panels exposes the internal section of the tile, which differs from the original non-cut side in colour and aspect.

end profile for RAFx

butech's top profile is a solution to hide the aesthetic inconvenience that occurs when a step has to be made with the Raised Floor. This profile, in addition to hiding the edge of the ceramic piece, allows us to anchor a vertical piece to the plot to hide the body of the plots*.

Made of aluminum, and with a length of 47 1/4" (1200mm), it can be used in thickened units (SAP: 100280081) with a 25/32" (20 mm) depth, and in double-piece units (SAP: 100290783) with a 29/32" (23mm) depth. For a correct clamping of the vertical piece from its lower part, several units of the Lower Clip (SAP: 100253748) will be necessary.

*Option valid only for **plot n**

end profile for RAFx	
SAP	
100280081	1200 mm thickened
100290783	1200 mm double-piece units
100253748	lower clip

vertical enclosure clip

These clips have two components: upper clip, fixed to the pedestal head, and lower clip, which goes on a previously cut pedestal base.

The perimeter panels are easily installed with these clips.

For a correct installation, the pedestal base has to be cut as shown in the images.

Only compatible with **plot n**

vertical enclosure clip

COPING PIECE

Coping piece

These steps stand out for their straight design on the front and their uniform, modern appearance, where the front’s tone matches that of the tread surface. For increased durability, the connection between the tread and the front includes a micro-bevel that minimizes the risk of impact damage.

The mitered design between the tread and riser creates a defined, clean angle, which also allows for the riser’s dimensions to be adjusted according to specific needs.

The custom-made L-shaped solid piece offers a unique, seamless finish for any required termination.

Its most common use is in finishing Outdoor Raised Floors, stairs, and pool edges.

H = Height*
W = Width*
L = Length*

HOW TO INSTALL THE OUTDOOR PAVERS

THIC’KER tiles can be used in a wide range of applications, from raised floors, where the 20 mm thick pieces are laid on plots, to dry laying on sand, gravel or even directly on the ground. Extraordinarily resistant to loads and weathering, these tiles are the best solution for terraces, gardens and, in general, all types of outdoor flooring.

HOW TO INSTALL THE OUTDOOR PAVERS

1- Dry installation on grass
Installation on the ground without leveling layer and regularization of cement mortar. Ideal for garden areas.

2- Dry installation on gravel
THIC’KER tiles are laid on a layer of gravel without using any adhesive. It is the weight of the tiles themselves and the gravel present in the joints between tiles that keeps them fixed to the substrate.

3- Dry installation on sand
Installation similar to laying on gravel, but in which a layer of sand is used.

4- Thin-bed installation with cementitious adhesive
Installation in terraces requires qualified personnel. It is only recommended to employ professionals with proven experience in this type of work.

FLOATING STAIRS

Floating stairs

In architecture and in the construction sector in general, stairs are considered the main backbone of the room. It is a unique piece, both in its design and its functionality. Depending on the interior design, stairs can be subtly adapted to the interior design or highlight a specific area or element.

On the other hand, floating stairs expand the visual space and favour a better lighting of the environment. A levitation effect is achieved where the steps, using the same units as the floor, rise through the space floating in the air.

Characteristics:
Customized steps are available, but the standard measurements are:

- Length: 31 1/2", 35 7/16", 39 3/8" and 47 1/4" (80, 90, 100 and 120 cm)
- Width: greater than or equal to 11 1/32" (28 cm)
- Thickness: greater than 3 35/64" (9 cm)

This system is designed to be used primarily indoors, but can be adapted to outdoor projects.

System elements:

- 1. Anchoring:** depends on the type of wall. Only available for concrete, solid brick and sheet metal walls.
- 2. Step core:** steel structure (S275) with lacquered finish and lateral reinforcement for fixing the handrail.
- 3. h-920:** A High-Performance Adhesive and Sealant Based on Hybrid Polymer Technology.
- 4. Step box:** aluminum case covered with the PORCELANOSA Grupo flooring collection (EN 14411: 2012) chosen by the client. Supplied completely finished, ready to be installed.

* For a correct fixation, the union of these three elements will be made with a two-component epoxy adhesive.

CEMENT-BASED ADHESIVES

one-flex

one-flex is a high tech single-component, high-performance, polymer-modified thin-set mortar for interior installations of tile. This mortar has a high content of unique dry polymer, resulting in excellent adhesion to the substrate and tile. Formulated with low-dust technology, one-flex reduces dust by 90% during pouring and mixing, resulting in a cleaner environment.

Advanced, high-performance adhesive, with an excellent adherence and flexibility, suitable for the most difficult installations, like high traffic floors, radiant heating floors. Its performance and ease of application make it the ideal solution for the most demanding professionals. Specially recommended for laying rectified tiles.

Certifications/Standards:

ISO 13007 C2 E P1

ANSI: Exceeds ANSI A118.4 and A118.11

Features:

Single-component thin-set mortar

Polymer-enriched for high performance and deformability

Low-dust technology reduces dust by 90% resulting in a cleaner environment.

Smooth and creamy consistency for easy for easy application.

Open time > 30 min.

Mixing water: 5.5 U.S. qt per 50 lbs. bag.

Recommended uses:

Most interior residential installations on floors and walls.

Most interior commercial installations on floors and walls.

Installation of ceramic and porcelain tile, quarry tile, pavers, and many types of marble, granite and natural stone.

Indoor swimming pools or interior installations subject to prolonged water immersion.

one-flex mixed with water is not recommended for areas subject to severe freeze/thaw conditions.

Substrates:

Masonry cement blocks, bricks, cement mortar beds and levelling coats.

Concrete (cured at least 28 days).

Cement backer units (CBUs).

Gypsum wallboard for interior walls in dry areas only.

APA and CANPLY Group 1 exterior-grade plywood (interior, residential and light commercial in dry conditions only).

Properly prepared vinyl composition tile (VCT) and cutback residue (interior only).

Properly prepared existing ceramic and porcelain tile, quarry tile and pavers (interior only).

Do not use directly over gypsum-based substrates.

Over this kind of substrates apply suitable sealer before use. **butech** recommends **super-prim**

Materials:

Ceramic and porcelain tiles (water absorption < 0.5% according EN-ISO 10545-3).

Quarry tiles

Glass and mosaic tiles

Natural stone.

Do not use for moisture-sensitive stone, agglomerate tiles, DQS, cultured marble or resin-backed tiles.

Before using this product in any application not indicated in this catalogue, please perform a test or refer to the product's technical sheet.
